

Client report of Team 1

By Team 2

Bea Jae Kyeong, Esmanur Karaca

We worked with Team 1 as a client. We asked them to make an online Lecture page, which we can access to search for tutors and lectures we are interested in. Users can be a tutor, so they can post or upload their learning methods.

Our developers had shown us their web pages, and how they applied what they have learned in class. We have given them some feedback on the design of their web page, like changing the image of their main page into a bar graph and selecting a birth date in the registration page by using a calendar format in HTML. They have achieved it and also showed us how they managed it. Team 1 worked hard, sharing their parts separately and discussing it together. We are satisfied by their efforts on making the web page we wanted.
